

Maitre'D®

Software that serves you better

"It is clear that the increase in both profitability and customer satisfaction with the technology provided will guarantee that we achieve a ROI very quickly."

- Fred Khalilian, CEO Club Paris

Club Paris has chosen the Maitre'D software suite to help them run their business. Since last July, the Maitre'D POS system has allowed Club Paris to operate at peak efficiency in its Jacksonville, FL location and better manage their high volume of sales.

With nightclubs already running successfully in Orlando and Jacksonville and plans to open additional locations in 2007 in Miami, Costa Rica, and Las Vegas, Club Paris is aggressively growing its business with the help of a POS system that has allowed it to thrive and generate more revenue by providing the accuracy, reliability and speed of service that they required.

Mr. Fred Khalilian, CEO at Club Paris explains: "With over 3,000 transactions per night, we needed a dependable system to help us manage our operations, and provide our staff with tools to increase productivity and keep up with the high volume of transactions. It is clear that the increase in both profitability and customer satisfaction with the technology provided will guarantee that we achieve a ROI very quickly."

The System

Club Paris currently has 22 Maitre'D POS workstations set up in their Jacksonville nightclub running on PartnerTech POS hardware and Epson printers. The club is also using Maitre'D Inventory to control their food and beverage costs and manage inventory and purchasing, Electronic Funds Transfer, and Time & Attendance to manage their labor costs.
