

# Maitre'D®

Software that serves you better

## The Original Soupman

*"The corporate communications is by far the best I have seen in the industry. It has always been a reliable software package, and I would personally recommend it to other franchises."*

- Judy Baker, POS Manager

Mrs. Judy Baker, POS System Manager at Soupman, shares her experience with the Maitre'D system: "I have been working on the Maitre'D software for several years now. The software has an abundance to offer. I am a POS manager for a new and upcoming franchise, and we have Maitre'D installed in over 30 sites to date. The corporate communications is by far the best I have seen in the industry. It has always been a reliable software package, and I would personally recommend it to other franchises."

"What I like best about Maitre'D is the fact that it has all your needs in one package - Labor, Inventory and Accounting. Its ease of use and versatility allows me to customize the software for each end user. Posera's support is the best I have experienced in my twenty years in this industry. You can always count on the fact that there will be upgrades and enhancement made constantly to the software. This, along with the many third party interfaces, make Maitre'D my first choice in software."
